-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The abstract of the disclosure is objected to because of undue length as it is approximately 174 words long. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11 and 23-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 11 is indefinite because there is no direct antecedent basis in line 2 for the recitation of "said resistive layer". Claim 23 is indefinite because it recites "a substrate" without any correlation/distinction to "a substrate" previously recited in claim 1. Claims 24-26 depend from indefinite claim 23 and are indefinite for that reason.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1724

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-7,23,25,26 and 29-31 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by the disclosure of Manginell et al. (6,666,907).
6. Claims 1-27 and 29-31 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by the disclosure of Manginell et al. (6,527,835).
7. Claim 28 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by the structure shown by Cates et al. (4,726,822), as such claim merely recites a coated device and no micro-channel.
8. The remaining references listed on the PTO-892 and those cited on the PTO-1449 show art of interest.
9. Applicant's response to this Office action should also include the following editorial changes: page 3, line 5, "of" should be inserted after "variety"; page 3, line 20, "a" should be inserted before "solid"; page 5, line 20, "a" should be inserted after "generates"; page 6, line 1, "is as a" appears to have missing text; page 9, lines 3 and 5, the appropriate serial numbers for these applications should be provided; page 9, line 22, "wafers" should be "wafer"; page 10, line 1, "FIGs." should be "FIG."; page 17, line 21, "readsoption" should be "readsorption"; page 19, line 17, "injection" should be "injections"; and, in claim 3, line 1, "is" should be inserted after "layer".
